Hello GT friends,

First we would like to wish you a wonderful 2018 – an anniversary year – and many special moments with your Opel GT.

Over the Festive period we have been working on the new Homepage, which is now online: www.opelgt-dv.org

Some details are still being worked on and many more articles will follow. Have a look yourself....

We welcome 2 new Opel GT interest groups in the Federation: The GT Drivers Franken and the Opel GT IG Südheide. The contact persons and details will be added tot he Homepage.

Thus, we are now a community of 29 clubs and IGs as well as 34 supporting members. In total over 1,400 Opel GT drivers belong to the Federation.

The year has barely begun, as there was already the first highlight for us GT Lovers: the Opel GT Club Nederland showed the Experimental GT at the Interclassics exhibition in Maastricht. The Experimental GT took pride of place next to a very original 1973 Ocker Yellow GT/J and a better-than-new restored Monza Blue Kadett B. Many visitors – among them between 30 – 40 clubmembers - were surprised to see this special Opel GT at the show and many more wondered what it was. The GT Club crew were busy every day to inform the visitors. A German TV station filmed an item about the Experimental GT at the show. With 34.447 visitors over the 4 days it is the best attended show in the 25 year history.

We have just received the stand confirmation for the Techno Classica Essen. We have the same stand as in recent years: Hall 6.1 – 109. The TCE will take place from 21st to 25th March 2018. Further information will follow in February.

The event of this year will be for many the GrandTour - 50 years Opel GT. Here, too, we are currently working very hard on it. Next week we are again spending 2 days in Rüsselsheim for several meetings. On February 24, the organisation team will meet again in Wolfenbüttel for a working meeting. After that more information will follow regarding the program and the costs.

The GrandTour will take place from Tuesday September 18th until Saturday 22nd in Rüsselsheim. We will offer interesting daily tours to selected locations regarding the Opel GT history. Some have to do with the original press presentation and the driving tests of the Opel GT. More information later.
